KEYMACRO (Keyboard Macro Recorder) is a perfect tool to automate some repetitive tasks in your computer. KeyMACRO is a tiny tool to record and edit keyboard shortcuts. You can create commands by combining simple or advanced combinations of keystrokes that you perform in your PC. You can record up to 128 commands at the same time, and each command will be saved in the order that you record them, so you can edit any command at any time. How it works: KeyMACRO is easy to use: after starting it, you just need to point the mouse cursor to a specific spot of your Desktop, and then you will see two buttons below, one with the green arrow pointing up and the other with the red arrow pointing down. Press and hold the hotkey you want to record and click on the green arrow button, then the computer will detect your command. When the command is recorded, press the red button to stop the recording. You can then edit the command by clicking on it and you will see three buttons: one for Add, one for Cancel and one for the actual command. When you are done editing, press the green button again to save the edited command and the next time you will press the green button, you will see the saved command in the list. To play the command, just press on the saved command. Please note that you can record any shortcut, not only keyboard shortcuts. How do I use it? You can use it in one of the two following ways: 1. You can select a shortcut that you want to record. Right click in the shortcut and you will see two buttons: "Add command" and "Edit command". 2. You can select a short

time period in which you want to record a shortcut, which you can use to record any commands, even several short commands. We recommend you to always record the shortcut when you press it, so you can edit the shortcut even several days later. Which features does it have? KeyMACRO comes with the following features: 1. Up to 128 commands per shortcut 2. You can record a short time period 3. You can view the recorded commands and edit the shortcuts at any time 4. You can view the list of shortcuts 5. You can Export the list of shortcuts 6. You can Copy and Paste the shortcuts 7. You can Share the shortcuts via Email or through a web service How do I use it? 1d6a3396d6

The Millennium Domesicle - Have you ever thought to why are there not so many applications that are released for Android devices, that can be used with tablet pc, laptop, android etc.? Why is it not possible to develop and deploy apps that can run on multiple screen types? As it turns out, the answer to this question is actually very simple: The process is expensive and time consuming. The graphic designers behind these apps have to make sure that the app works great on the various screen sizes before releasing it. - This is where the Millennium Domesicle comes in. The website is kind of like a catalogue that allows the graphic designers to showcase their applications. This great website has a great selection of apps and games for both Android and Windows mobile devices.
