In-House Codes/Extensions AutoCAD also has the ability to internally create coded subroutines that are used to make adjustments to the functionality of the program, usually to help the user accomplish a task or something that is being done often. These codes are called Extensions or In-House Codes (IHC). These are written by In-house developers, who develop the extension and submit it for review. Once the review is complete and the extension is approved, it is added to the Autodesk Exchange Library and made available for download. License Up to release 2005, AutoCAD LT has been a product where users must pay a yearly maintenance fee (\$500) and have a current version of AutoCAD as a prerequisite to run the software. In 2006, Autodesk released AutoCAD as a "free" product for consumers and small businesses that were not able to justify a yearly maintenance fee. AutoCAD 2009 and later releases are compatible with AutoCAD LT. Development AutoCAD used to use Microsoft Visual Studio and Microsoft.NET Framework for development. For AutoCAD 2010 and later, AutoLISP was used for development. When AutoLISP was removed from AutoCAD, AutoCAD relied on either Microsoft's Visual Studio or Microsoft's.NET Framework for development.
