Photoshop Elements is quite small. It is only 8 MB, about 1/100th the size of its mainstream sibling (PS CS6 is sometimes, incorrectly, cited as 11 MB).

Its file size is even smaller than some dedicated image editors, and is close to the maximum limits of many web

browsers. In Part 1: What Photoshop Elements Does/Doesn't Do

Photoshop/Photoshop Elements is much more than a photo editor. While the easiest way to use Photoshop is to open and close files, the more sophisticated users edit their photos using layers and use the powerful automatic adjustments, filters and effects available in

Photoshop. Photoshop Elements is an

option for those users who need to edit photos without layers, or who just want to crop and resize images. And perhaps more importantly, it is a great option for those photographers (or graphic designers) who work with photos, but never attempt to create images at the professional level. Elements is part of the Lightroom family of tools, and you can use Lightroom or Lightroom Classic CC to open and edit photos. Elements is useful for photographers who have no interest in Lightroom or any other photo editing software, and also for those who prefer the specialized tools (like for resizing and cropping) that a photo editor offers. The Basics of Photoshop

Elements Also referred to as Photoshop, this is Adobe's flagship image editing software package, and the flagship photo editor. It is the foundation upon which all the other Adobe offerings are built, and it is the most powerful photo editor available. In addition to editing and manipulating images, Photoshop includes tools for creating new files, setting the camera exposure, fixing color problems, making adjustments to existing images, and creating graphics like gradients, text and effects. The Elements version has similar functionality, but is much simpler and easier to use. Features Like the familiar interface of Photoshop, Photoshop

Elements has the same basic tools, all of which work in the same way. There are tools to resize, crop, rotate and straighten images. There are also tools to move, copy, select and delete areas. There are brushes to apply color and effects, and tools for adding borders, line art and filters. Elements offers a few more tools, like a simulated film camera's custom settings, an unlimited roll of negatives and a suite of basic editing tools (like Levels and Curves). For those familiar with Photoshop, Elements is a fairly limited photo editor. It isn't as powerful as Photoshop, but it 05a79cecff

Gymnastics at the 2016 Summer Olympics – Men's artistic team all-around

The men's artistic team all-around gymnastics competition at the 2016 Summer Olympics in Rio de Janeiro was held at the Olympic Gymnastics Stadium. Qualification

Team selection To qualify in each apparatus, athletes must earn points during the team all-around qualification. In every apparatus, athletes competed with one score to the team, or four scores to the apparatus, with the team consisting of four athletes. The top 24 teams in the qualification rounds were

added to the team final. Any remaining places were filled by qualification teams not already qualified, with the top team in the group of six nations advancing to the final. Only one team per country was allowed to qualify in each apparatus. If an event was cancelled, a team would remain in consideration for that apparatus. Ties would be settled by adding the scores of the tied teams and the scores of the team occupying the highest qualifying position. If the scores of the highest qualifying team were still tied, the next highest would determine the team's ranking. Final Result

opioids in patients with OA. The present study investigated the effect of acupuncture on the treatment of OA. The results confirmed the previous studies, which showed that acupuncture is a safe treatment method that has fewer side effects than opioids, especially when used for long-term treatment. A few studies have also suggested that acupuncture may be used as a treatment adjunct for OA. The present study is one of the first to investigate the efficacy and safety of acupuncture in the treatment of OA. This method may be used as an alternative to opioids in the treatment of OA, and should be investigated further. The main finding of

the current study was that acupuncture with CHM was effective and safe in the treatment of OA, as shown by the significant improvement in the WOMAC function scores. The effect was evident as early as 1 week after the treatment and sustained for 6 weeks. This result was comparable to that of acupuncture with opioid medication, which showed effective pain relief. However, the WOMAC function scores were significantly higher in the acupuncture group than in the placebo group at 1 and 2 weeks. All of the patients showed a significant decrease in the WOMAC scores at 1 week after treatment. The score of the electro-

acupuncture group decreased more than that of

The spectrum of subcellular injury in the myocardium: an evaluation by magnetic resonance microscopy. The extent of damage to the myocardium and the subcellular level to which this extends are currently an area of controversy. A method for the noninvasive assessment of this damage by magnetic resonance microscopy has recently been reported. In seven patients with acute myocardial infarction, abnormalities of relaxation times as assessed by a spin-spin relaxation time T2 mapping sequence

have been observed in areas of recent infarction. In four of these patients, the abnormalities were present in areas where previous radionuclide imaging studies had failed to demonstrate injury. The authors propose that the abnormalities result from disruption of myocardial collagen due to ischemia and reperfusion injury and that these provide an adjunct to conventional radionuclide imaging. The South African FA says it will look at legal action against Vodacom for comments made by Vusi Punditika during the 5-0 home defeat to Uganda in the Nations Cup this week. There were no Vodacom-owned media cameras in the stadium, and the company claims

Punditika's comments "infringed his contractual obligation as a sports presenter to the company." Punditika made the following comment, picked up by TimesLive: "This is a humiliation for the country, an embarrassment for the players, a black eye for the dressing room. Africa, don't stand for it. A black eye for my country." Vodacom says they were not aware of Punditika's comments as he had not been invited to the match on its proprietary service and they would not have been in the position to invite him to the game if they had known. The company says they will continue to monitor Punditika and will consider further action if necessary. In the

meantime Punditika says he does not regret his comments. The SAAFA, in their response, said the commentary, while harsh, was a fair reflection of the game as a whole. "Indeed, most statistics show that the SAAFA had not performed well for the last decade and that the Bok coaching structure was not suited for world class players (who) required more supervision and instruction," the SAAFA said. Vusi Punditika says he does not regret his comments and has no regrets about the team's performance. Photo: S
